Detectable Foil Underground Tape

Installation and Specification Guide

PRODUCT DETAILS

Protect and easily identify underground infrastructure with our detectable foil underground warning tape.

ROLL WIDTHS 100mm & 150mm
ROLL LENGTHS 100 metres & 250 metres

FEATURES AND BENEFITS

- Manufactured in accordance with Australian Standard AS/NZS 2648.1:1995 (Underground Marking Tape - Part 1: Non Detectable)
- Printed coloured plastic strip of aluminium foil

Installation

DETECTABLE FOIL

1. Underground warning tape is used to provide a visual warning that a buried pipe, cable or other service is below. It is recommended that the tape be buried halfway between the buried service and the surface of the earth.
2. To install, unroll your tape, onto the backfill in the trench.
3. Backfill the trench further to the surface.

NOTE: Consult with your locator supplier for further details of the exact depth your equipment can locate to.

PRODUCT SPECIFICATION

| | |
|-----------------|----------------------------------|
| Material Types: | Aluminium and Polyethylene |
| Tape Thickness: | 100µm |
| Message Repeat: | 600mm (depending on word length) |
